T·A·P® INSTALLATION PACKAGE 425-PCO

T·A·P® 425-PCO Machine w/ 7 cu. ft. Hopper & Dual Agitators (40 bags/hr.)

T·A·P® PEST CONTROL INSULATION

The 425-PCO TAP® Insulation Blower System is a tough, economical machine for the small contractor or the seasoned installer. Handling one bag of TAP® insulation at a time, it's portable, allowing the contractor to complete most attic capping jobs in about an hour (35 bags) once prep work and setup is complete. The system runs off two 110 outlets, so a generator is not needed as long as 10-3 power cords are utilized. It is not unusual for a Pest Management Professional to pay for the equipment purchased within the first six jobs!

Your 425-PCO package includes:

- Hose Reel
- 2 Wheel Package
- Remote Control (Wired)
- 2 10-3 Power Cords
- 100 Baffles (2 sizes) & 100 Vents
- 1 Package of Insulite®
- 1 Roll of InsulShield® (Aluminum Top-Hat Material)
- 100 Attic Rulers
- 1 Roll of Insul-Web Netting (4'x375')
- 1 Hammer Stapler w/ Staples
- Flexible Hose (2.5'x150')
- 1 TAP® Thermal Demo Unit
- 1 TAP® Acoustical Demo Bucket
- 1 Fiberglass Acoustical Demo Bucket
- 1 Panic Alarm (for use with Acoustical Demo Buckets)
- Marketing Aids

TAP® arrives in 30 lbs. bales, palletized (36 bags/pallet). Discounts available for quantity purchases. Product shipped F.O.B. manufacturing plans (16 locations across the US).
