

WHAT'S IN THE ATTIC?

T·A·P®
PEST CONTROL
INSULATION

T·A·P® is the result of the combination of a pesticide with the best insulation for a patented product that:

- Controls Pests
- Saves Energy & Money
- Absorbs Sound
- Provides a Perfect Fit
- Is Environmentally Friendly
- Delivers Fire Resistance
- Contains all-Natural Ingredients
- Is Permanent

EVERYTHING ELSE IS JUST INSULATION.

T·A·P® Helps Protect Your Home

Insects cannot build up a tolerance to TAP®, as they can with organic biological treatments, and you never need to re-treat the insulation. TAP® controls ants, cockroaches, silverfish, termites, and other pests listed on the EPA label.

EPA-Registered Pesticide Containing Boric Acid

Technical Grade Boric Acid, the active ingredient in TAP®, is found in common household products such as saline eye wash solution, detergents, and the food we eat. Although deadly to many insects, TAP® is acceptable for use around pets and people.

Save Money and Decrease Energy Bills

TAP® helps keep homeowners cool in the summer and warmer in the winter. Comfort. Conservation. Comfortable Conservation!

Fire Safety

TAP®, with its fire-retardant characteristics, limits the spread of fire with both flame and smolder combustion resistance.

The Quiet Life

TAP® reduces annoying outside noise and helps make your home a quiet, peaceful haven.

T·A·P® is Green!

Well, not literally, but TAP® is made from all-natural ingredients and recycled newsprint, thus while you're controlling pests and saving energy, you're conserving landfill space. Plus, it will be effective for the life of your home.

A Perfect Fit

TAP® forms a perfect fit in your attic, leaving no gaps, covering nooks and crannies, capping the entire attic floor. TAP® helps block heat transfer from convection and radiation, as well conduction.
