

T·A·P® HIGH-OUTPUT 475-PCO

TAP® 475-PCO Machine w/ 1 1.5 cu. ft. Hopper & Dual Agitators
(70 bags/hr.) - BASIC PACKAGE

T·A·P®
PEST CONTROL
INSULATION

Produced by Krendl, the 475-PCO high output TAP® Insulation moving system is a tough, fast production machine for the mid-to-large Pest Management Professional looking to increase productivity and profit. This system has nearly twice the production rate of our smaller starter system and will help cut labor costs by reducing project completion times. The 475-PCO runs on 120 volts and is powered using two 110 outlets. A generator is not needed as long as the 10-3 power cords are utilized.

The 475-PCO is also equipped with a variety of upgrades that are very beneficial to the operator. This machine comes standard with variable air velocity controls and is onboard equipped for the optional internal misting attachment and the optional wireless remote. This is a top-quality machine designed for users who are seeing their TAP® Pest Control Insulation business expand and need to get their crews on a job site, finished and on to the next project ASAP!

Mechanical Features:

- Output rate up to 70 Bags of TAP® per hour using a 3" blowing hose
- Safety guards provide operator protection
- Removable hopper for quick and easy access to the airlock
- Modular component design for quick disassembly/reassembly for easy trouble shooting and maintenance
- Improved blower filter design for less filter maintenance

Electrical Features:

- 150 ft. (46m.) remote control cord with three (3) position switch for more control of feed and blower
- Emergency kill switch and manual override at machine
- 10 amp thermal overload protection

Package Includes:

- 150' of 3" hose
- Hose Reel
- 2 10-3 by 100' power cords
- All necessary connectors and clamps

- Multiple auxiliary convenience outlets
- 1 amp glass fuse protection for transformer providing properly sized fuse protection on the 2 amp transformer

TAP® arrives in 30 lbs. bales, palletized (36 bags/pallet).
