

T·A·P® PPE - COVERALLS

Safety First - Protect Your Employees

T·A·P®
PEST CONTROL
INSULATION

Keep your employees' skin and clothes protected with TAP® Coveralls. These white, disposable, and micro-porous coveralls with hood are ideal for any TAP® Pest Control Insulation or ComfortTherm® Crawl Space Fiberglass Insulation job. The tough composite fabric boasts a unique combination of breathable micro-porous film and lightweight, soft, non-woven polyolefin to create an effective barrier while still allowing for comfort.

For greater freedom of movement and durability, the TAP® coveralls are generously cut in the seat and arms. They feature a tight-fitting hood for extra protection, while the elastic wrists and ankles allow for a snug fit. Additionally, the front zipper helps provide a secure closure. Use them wherever a high-level of protection from contaminants is desired, such as insulation, dust, and pesticides. The TAP® Coveralls pair nicely with safety goggles, work gloves, shoe covers, and TAP® cap or bump hat.
