

KAIFLY™ CLEANING SYSTEM

T·A·P®
PEST CONTROL
INSULATION

The innovative patent-pending KaiFly™ Cleaning System combines microfiber, window squeegee, and chemical injection technologies to rapidly remove harmful bio-pollutants from desktops, chalk and dry erase boards, tabletops, stalls, partitions, windows, and so much more.

KaiFly™ is scientifically proven to clean at least six times better than towels or wipes. Tested with an ATP measurement device, it was found that cleaning with microfiber towels or rags left approximately six times more soil behind on average. Plus, the KaiFly™ Cleaning System is so effective at removing harmful bio-pollutants that it has been verified by an independent NELAP-accredited lab to remove 99.9% of targeted microbes when used as directed—using water only.

In addition, convention cleaning methods, such as microfiber towels or rags, are typically less effective as workers clean more and more surfaces. This cross-contamination can leave the last surface cleaned with two to eight times more soil than the first surface cleaned. KaiFly™ maintains equal effectiveness regardless of the number of surfaces cleaned and reduces the risk of cross-contamination.

Ergonomically designed, KaiFly™ also cleans in half the time or less than traditional methods. Spraying diluted cleaning chemical directly onto the microfiber pad allows for quicker and more even application on surfaces. The squeegee then finishes the job by simultaneously removing soils and drying surfaces in one swipe. KaiFly™ also eliminates the circular scrubbing motion typically used with towels and rags, relieving strain on workers' backs and shoulders.

Highlights

- KaiFly™ removes six times more soil and bio contaminants than conventional methods, such as microfiber towels and rags.
- Maintains the same amount of cleaning effectiveness from the first surface cleaned to the last, minimizing the risk of cross-contamination.
- Ergonomically designed to relieve strain on workers' backs and shoulders by use of fluent motions rather than strenuous circular motions.
- Cleans in half the time of traditional methods, increasing worker productivity.

KaiFly™ Cleaning System includes:

- 1 Trowel
- 1 Handheld Squeegee
- 1 Motorized Sprayer
- 1 Quart Bottle
- 1 Holster
- 1 Monster Hook
- 5 Microfiber Pads
